

ADMINISTRATOR GUIDE

Inventory Management System

Version 4.0

1. INTRODUCTION

1.1 Purpose

This Administrator Guide provides instructions for managing and maintaining the Inventory Management System.

It is intended for **administrators with full system privileges**.

This guide covers:

- Inventory item management
 - User management
 - Transaction monitoring
 - Administrative best practices
-

2. ADMIN ACCESS

Administrators access advanced system features through:

- The application dashboard
- The Django Admin Panel

Admin Panel URL:

`http://<host>/admin/`

3. MANAGING INVENTORY ITEMS

3.1 Creating an Item

Steps:

1. Log in as Administrator
 2. Open the Admin Panel
 3. Navigate to Inventory → Items
 4. Click “Add Item”
 5. Enter item details:
 - Name
 - Initial quantity
 - Minimum threshold
 6. Save the item
-

3.2 Updating an Item

Administrators may update:

- Item name
- Minimum threshold
- Active/inactive status

Direct stock quantity editing is **restricted**.

3.3 Deactivating an Item

Steps:

1. Open the item in Admin Panel
2. Set status to inactive
3. Save changes

Inactive items:

- Do not appear in active inventory
- Retain historical transaction data

4. TRANSACTION MONITORING

Administrators can:

- View complete transaction history
- Audit stock movement
- Identify abnormal activity

Transactions are:

- Append-only
 - Immutable
 - Time-stamped
-

5. USER MANAGEMENT

Administrators may:

- Create users
- Assign roles (Admin / Staff)
- Activate or deactivate user accounts

Steps:

1. Open Django Admin Panel
 2. Navigate to Users
 3. Modify user permissions or groups
-

6. DASHBOARD MONITORING

The dashboard provides administrators with:

- Inventory summaries
- Low-stock alerts
- Recent activity overview

This data assists in operational decision-making.

7. SYSTEM MAINTENANCE

Recommended administrative practices:

- Regularly review low-stock items
 - Audit transaction logs
 - Maintain secure credentials
 - Backup database periodically
-

8. SECURITY RESPONSIBILITIES

Administrators are responsible for:

- Managing access rights
 - Preventing unauthorized access
 - Ensuring data integrity
-

9. TROUBLESHOOTING

Common issues:

- Users unable to log in
- Transaction failures due to stock limits
- Permission errors

Resolution steps:

- Verify user roles
 - Review error messages
 - Check transaction logs
-

10. ADMINISTRATIVE NOTES

- Never bypass transaction logic
- Do not manually edit database records
- Use admin tools responsibly
