

USER MANUAL

Inventory Management System

Version 4.0

1. INTRODUCTION

1.1 Purpose

This User Manual provides instructions for authorized users to operate the Inventory Management System.

It is intended for **staff users and administrators** who interact with the system through the web interface.

This manual covers:

- Logging into the system
- Viewing inventory items
- Creating stock transactions
- Understanding inventory status

2. USER ROLES

2.1 Staff User

A Staff User is responsible for day-to-day inventory operations, such as recording stock movement and monitoring inventory levels.

Staff users **cannot**:

- Create or edit inventory items
 - Access system configuration
 - Access the Django admin panel
-

3. SYSTEM ACCESS

3.1 Login

Steps to log in:

1. Open the web application URL
2. Enter your registered username
3. Enter your password
4. Click the “Login” button

If credentials are valid, the user is redirected to the dashboard.

If credentials are invalid, an error message is displayed.

3.2 Logout

Steps to log out:

1. Click the logout icon in the navigation bar
 2. The system ends the session
 3. The user is redirected to the login page
-

4. DASHBOARD OVERVIEW

The dashboard provides a high-level overview of inventory status.

Displayed information includes:

- Total number of inventory items
- Number of active items
- Number of low-stock items
- Recent inventory transactions
- Stock-level visualization charts

The dashboard updates automatically based on the latest transactions.

5. VIEWING INVENTORY ITEMS

Steps to view inventory items:

1. Navigate to the “Items” section
2. The system displays a paginated list of items
3. Each item displays:
 - Item name
 - Current quantity
 - Minimum threshold
 - Stock status (OK / Low)

Low-stock items are visually highlighted.

6. CREATING STOCK TRANSACTIONS

6.1 Stock IN Transaction

Steps:

1. Navigate to “New Transaction”
2. Select the item
3. Choose transaction type “IN”
4. Enter quantity
5. Submit the form

Result:

- Item quantity increases
 - Transaction is recorded
-

6.2 Stock OUT Transaction

Steps:

1. Navigate to “New Transaction”
2. Select the item
3. Choose transaction type “OUT”

4. Enter quantity
5. Submit the form

If sufficient stock exists:

- Item quantity decreases
- Transaction is recorded

If stock is insufficient:

- Operation is rejected
- Error message is displayed

7. ERROR HANDLING

Common system messages:

- Invalid input
- Insufficient stock
- Unauthorized access
- Session expired

Users should contact an administrator if errors persist.

8. SECURITY GUIDELINES

- Do not share login credentials
- Always log out after use
- Report suspicious activity to administrators

9. SUPPORT

For technical issues, contact the system administrator.
